

My name is Justin Pardy;I am a musician/songwriter & recordingartist.I'm also a media consumer.I live in Maine and work as a Direct Service Professional chiefly.

I have hundreds of songs, many collaborations with other writers, filmmakers & theatre people. I've had airplay on major Maine stations, college stations,won on Rock Solid Pressure on the Internet, was a finalist at a ticketmaster show...I run my own label, play occasionally & have local & New England subculture respect.

I've sent several cds out;some stations have local shows...WCLZ...WRBC...WMPG...WTOS...WUNH. Some of my music may be accessible,some may be dark,some is satire.All of the above stations play local music.

FCC should define

I think all decisions should be made at the local level.

All.

An example.

I would favor any independent efforts without financial bribing.

Voicetracking is wrong...keep it local,not corporate.

Local artists are stifled in general;we need more voices & choices.

I think they are fine.They do benefit the immediate community,I think.

Thanks for your time!
